## GENERAL MANAGER'S WELCOME

Dear Customer,

This year we offer orchardists a new dedicated Tree Crop and Kiwifruit Buyers' Guide which includes our range of Quantum Mist™ Tower sprayers, Cropliner, Kiwiliner, Avoliner, Cropair and Self Propelled Cropliner sprayers.

Croplands Quantum Mist™ fans, and our range of Fieni fans, are still unmatched for COVERAGE in orchard applications worldwide. Superior coverage means you can count on CONTROL of diseases and pests in your orchard and fruit and ultimately a more profitable yield and CASH in your pocket.

With a model to suit all orchard sizes, there is no excuse not to use the best for your orchard spraying. There is a Sprayer Selection Guide on the last page of this guide to help you select the perfect model for your operation. Alternatively, you can contact your local Croplands reseller or Croplands Territory Manager on the back of this guide to discuss the model that's right for you.

*Sean Mulvaney* **Sean Mulvaney**  
General Manager  
Croplands

We are proud to have manufacturing footprints in both Australia and New Zealand. You can trust our local ownership and what we put back into our local industries.

## WE HAVE YOU COVERED

Croplands started their business in 1972 making and selling orchard sprayers for apples.

Today, we have a strong line-up of sprayers designed specifically for the tree crops and kiwifruit grown throughout New Zealand – from far North for avocados, central New Zealand for apples, all the way to the far South for cherries, apples and all types of stone fruit.

Our philosophy is simple – make the machines tough, dependable and provide our growers with maximum spray coverage potential. On the left, by crop, we have attempted to make it easy to choose the options for the fruit crop, or crops, you grow. If you grow multiple varieties or crop types, you will still find a sprayer in our stable that will meet your needs.

Our relationships in the fruit industry have very been long-standing – Annovi Reverberi for great pumps, Fieni for great fans, our strong group of service agents throughout the country and the committed national sales team at Fruitfed Supplies.

So, trust the brand that delivers on the spray coverage you demand.

Croplands tree crop and kiwifruit range:

- » **Tough and reliable**
- » **Rugged and dependable**
- » **Made with pride and great components**
- » **Service always close by**

Make your choice from Croplands, you won't be disappointed.

# CROPLINER FIBREGLASS SLIMLINE 2000 LITRE

Fitted to our Cropliner Airblast Sprayers, the Croplands DSV fan range gives unmatched performance with surprisingly low horsepower inputs. Lower noise, lower fuel use and higher air output set these apart from our competitors.

## STANDARD FEATURES INCLUDE

Heavy duty brass  
170 pump standard

Brass roll over nozzle  
bodies standard on  
all fans

Cropliner Fibreglass model in apples

The mainstay of our orchard sprayer range.

In 2012, Croplands introduced a new 920mm fan with downstream straightening vanes (DSV) with remarkable improvements to spray coverage. Features include:

### FAN

- » 820mm and 920mm DSV fan options – stainless steel volute and glass-reinforced nylon blades
- » Three options of fan pitch (set standard in mid-pitch)
- » Stainless steel spray rings with 14 brass roll-over nozzle bodies per side for unparalleled coverage options and set up
- » 2-speed gearbox provides air output options for varying tree sizes and/or canopy development
- » Centrifugal fan clutch for smooth fan engagement

### CHASSIS

- » Hot-dipped full length c-channel chassis for strength and corrosion resistance
- » Heavy duty adjustable length drawbar

- » Adjustable axle

- » Rear fan protection, sump protection and rear bumper

### TANK

- » Gel-coat fibreglass construction for high strength and smooth finish
- » Shaped for minimum crop interference
- » 30 litre fresh water tank
- » Twin supra-mix agitation, plus bypass

### PUMP

- » Positive displacement, four-diaphragm, Annovi Reverberi brass head/bronze manifold pump for maximum corrosion resistance and reliable performance, year in, year out

Prices and specifications subject to change without notice.  
Photos are for illustrative purposes only.

**CROPLANDS**

# CROPLINER POLY TANK XL SERIES

Not everyone needs a Slimline Cropliner for their orchard – tank size, fan size or other features may be more important. The XL Cropliner range provides features such as:

- » Durable, UV-stabilised polyethylene 1500, 2000, 3000 and 4000 litre tank options
- » Fresh water flushing tank on all models for safe cleanout before returning to the spray shed
- » 820DSV, 920DSV and 1060DSV fan options (1060 on the 3000 and 4000 litre only)
- » 170 L/min brass diaphragm high pressure pump standard on larger models, 140 L/min anodised pump on the 1500 litre model
- » 200 L/min brass pump is optional on the larger models
- » Suspension is optional on the single axle
- » Flotation tyres are optional on single axle 2000 litre; standard on the 3000 and 4000 litre models
- » Tandem axle is optional on 2000, 3000 and 4000 litre models
- » Hot-dipped full length c-channel chassis for strength and corrosion resistance
- » A suction probe and tank fill point are optional on the 1500 and 2000 litre, standard on the 3000 and 4000 litre models

4000 litre Cropliner with 1060 DSV fan

## DEVELOPMENTS FOR 2018

This year at Croplands, some testing has been conducted on a Cropliner/Quantum Mist™ 'hybrid' to look at possible coverage improvements and options for spray thinning applications. With the changes developing in orchard plantings and the chemistry for thinning applications changing, the time was right for a more scientific approach and some clear results-based testing. Look for more information as the year progresses in 2018.

## MAXIMUM GRUNT

In 2015, Croplands finalised the evaluation of a 1060mm DSV fan for use in larger trees. With an output upwards of 100,000 m<sup>3</sup> of high volume air, the 1060 fan has brought a whole new dimension to spraying in citrus, avocados, nuts and other large tree crops.

## SMALLER ORCHARDS → CROPAIR LINKAGE

### CROPAIR 300

- » 300 litre main tank
- » 30 litre flushing tank
- » 15 litre hand-wash tank
- » 500mm fan – single speed
- » 5 brass double rollover nozzle bodies per side
- » High pressure triple diaphragm pump fitted
- » 25–30 hp power requirement
- » Remote mounted manual tap control standard
- » Optional electric controls

300 litre Cropair with 500mm fan

### CROPAIR 600

- » 600 litre main tank
- » 85 litre flushing tank
- » 15 litre hand-wash tank
- » 800mm fan – 2 speed with clutch
- » 6 brass double rollover nozzle bodies per side
- » High pressure triple diaphragm pump fitted
- » 50 hp power requirement
- » Remote mounted manual tap control standard
- » Optional electric controls

600 litre Cropair with 800mm fan

# QUANTUM MIST™ TOWER SPRAYER

The Quantum Mist™ Tower Sprayer provides excellent spray coverage in medium sized tree crops up to 5 metres in height.

Benefits of the 3-head per side design are:

- » High-volume, turbulent air delivery – 108,000 m<sup>3</sup> per hour
- » Increased coverage in the tops of trees
- » More flexible chemical thinning options

## OPTIONAL MICRO POWER PACK (INDEPENDENT OIL SUPPLY)

This new and revolutionary design enables smaller tractors to power the Quantum Mist™ with less reliance on tractor hydraulics. The Micro Power Pack has a reduced impact on the environment and is quieter, cooler and lighter.

Excellent coverage

Intensively grown tree crops, such as apples and stonefruit, require more spraying than most other tree crops. The Quantum Mist™ Tower Sprayer provides unrivalled coverage and other added advantages over standard sprayers.

Using 8 nozzles per fan, equating to 24 nozzles per side, more droplets in the upper part of the tree can be achieved and at higher travel speeds.

Other advantages include:

- » Highly targeted areas for thinning sprays
- » Shut off for top fans for smaller trees in developing orchards
- » More high-volume air in a wider spray swath giving unmatched spray coverage at lower application rates
- » Higher spraying speeds compared to traditional airblast sprayers

## SLIMLINE QUANTUM MIST™ TOWER FEATURES

- » 2000 litre narrow, low profile tank and chassis (1400mm at widest point)
- » 80 litre fresh water flushing tank
- » Standard tractor-supplied oil supply for fans or optional fully enclosed Micro Power Pack (pictured left)
- » 108,000 m<sup>3</sup> of air available via six Quantum Mist™ 500 fans
- » New model 180 L/min diaphragm pump for 2018
- » Auto spray rate controller options – see page 10 for more information
- » 2000 and 3000 litre XL models also available. For full specifications and options, see page 11

2000 litre Slimline Quantum Mist™ Tower Sprayer

# AVOLINER

## AVOLINER FEATURES AND OPTIONS

- » Low profile 2000 litre poly tank with fresh-water flushing tank standard
- » 920mm DSV fan for avocados; down-stream straightening vanes, rear trash protection and new design glass reinforced nylon fan blades
- » Stainless steel fan shroud – rugged and totally corrosion resistant
- » 2-speed gearbox for fan to allow for varying canopy growth stages
- » 170 L/min brass pump standard – totally corrosion resistant
- » 200 L/min brass pump optional
- » Brass roll-over nozzle bodies to allow a choice of application rates
- » A choice of controller options from electric to fully automatic spray rate control
- » Fully hot-dipped galvanised chassis with rear and side bumpers

**SEE THE AVOLINER  
IN ACTION HERE**

# SPRAYERS FOR KIWI FRUIT AND AVOCADOS

Where a shorter and lower profile is needed

# KIWILINER

## KIWILINER FEATURES AND OPTIONS

- » Low profile 2000 litre poly tank with fresh-water flushing tank standard
- » 820mm DSV front entry fan for kiwifruit; down-stream straightening vanes and new design glass reinforced nylon fan blades
- » Stainless steel fan shroud – rugged and totally corrosion resistant
- » 2-speed gearbox for fan to allow for varying canopy growth stages and tree sizes
- » 170 L/min brass pump standard – totally corrosion resistant
- » 200 L/min brass pump optional
- » Brass roll-over nozzle bodies to allow a choice of application rates
- » A choice of controller options from electric to fully automatic spray rate control
- » Fully hot-dipped galvanised chassis with rear and side bumpers

## OPTIONAL FEATURES – KIWILINER AND AVOLINER

### HV4000 AND BRAVO 180 CONTROLLERS

Fully automatic spray rate controllers for use with solenoids. Spray rate is calculated using speed and flow inputs with calibration values pre-set by the operator.

HV4000

BRAVO180-ARAG2

### OTHER OPTIONS INCLUDE:

- » 4-section spray ring
- » 400 x 15.5 flotation tyres (Avoliner only)
- » Triple roll-over nozzle bodies
- » Organic nozzle bodies optional in lieu of standard
- » Additional top spray gun assembly for avocados and tall trees

**Narrow headlands  
are no challenge for  
the Self Propelled  
Cropliner.**

## **SELF PROPELLED CROPLINER**

For kiwifruit spraying, the Self Propelled Cropliner sprayer offers unsurpassed practicality, comfort and spray coverage.

The Self Propelled Cropliner can go more places than your current tractor and trailed or linkage sprayer combination, thanks to its low and compact design.

This unit is built with operator comfort and practicality in mind. The fully enclosed cab with carbon filters has air conditioning and excellent visibility from the windscreen and rear camera.

With four wheel steer the tight turning capability of the Self Propelled Cropliner means that properties with narrow headlands are no challenge, and you will increase your spraying efficiency by quickly getting into the next row.

### **2000 LITRE FEATURES**

- » 2000 litre tank capacity
- » 63 kW (85 hp) 4 cylinder turbo diesel engine
- » 5 forward and 1 reverse gear
- » Dual range high/low gearbox
- » Speed ranges from 1–24 kph
- » Selectable 2 or 4-wheel steering with mechanical drive
- » Brass AR170 L/min (40 bar) diaphragm pump, belt driven
- » 820mm Fieni front entry fan with double rollover nozzle bodies – 14 per side
- » 400/60 x 15.5, 8 ply tyres
- » Hydraulically operated 4-wheel disc brakes
- » Fully sealed cab with carbon filters
- » Dimensions: L 5,580 x W 1,870 x H 1,370 mm
- » Weight: 2,630 kg (dry)

**NEW  
FOR 2018**

## NEW SPRAYWISE HORTICULTURE APPLICATION HANDBOOK

Nufarm's Spraywise Horticulture Application Handbook will answer all your questions on dosage rates, chemical mixing, assessing coverage, nozzle selection, drift, calibration, adjuvants and more.

To order your copy contact Croplands on freecall 0800 106 898.

## HV4000

Fully automatic spray rate controller for use with motor valves or solenoids using speed and flow inputs, with calibrated values pre-set by the operator.

- » On-the-go spray rate adjustment using pre-set keys
- » Flow-based control using flowmeter for accuracy
- » Tank volume indicator
- » 10 individual operating histories for area, liquid dispensed, distance and hours
- » 4 section control of motor valves or solenoids
- » Adjustable contrast screen, back-lit for night use
- » Pre-settable row widths for on-the-go adjustment
- » L/ha or L/100m options for area-based or unit canopy row based calibration and readout
- » Four screens partitions to display up to four current functions to keep the operator informed
- » Optional fan speed control

## HV2400

- » Display of two functions on screen
- » Large back-lit display
- » Heavy duty switches
- » Up to 10 pre-set application rates
- » Fully programmable
- » Alarm settings and integrated diagnostics
- » L/100m for application as an option
- » Optional kit comes with spray manifold with flowmeter, 2-section high pressure valve bank, looms, mount and operating instructions
- » The kit will require some extra fittings to fit to an existing sprayer

## BRAVO 180

- » Connectivity for GPS input and remote main control
- » USB drive for data transfer and applicable software updates
- » Application specific software for orchard spraying and multi-row applications
- » Tank level indicator option (with appropriate sensor)
- » Automatic tank profile calibration via flowmeter
- » Automatic flowmeter calibration capability
- » Auto-stop function if required at set minimum speed
- » Capacity to store 10 job configurations
- » Visual and audio alarms can be set as required
- » Temporary increase/decrease of spray output if required
- » Can be set to L/ha or L/100m
- » Display capability for speed, pressure (with optional sensor), flow rate, total output, tank level, area covered, time elapsed and distance covered
- » Optional fan speed control

## VISIO CONTROLLER

For growers who wish to monitor their spray application rate but prefer to control the application either manually or with basic electric controls, the Visio monitor offers a cost effective solution. Coupled with a flowmeter and speed sensor, the Visio can display area applied, spray rate in L/ha, L/min and current speed. This is a very useful and simple tool for the operator to monitor the spray application. It comes as a kit to fit to existing sprayers; this may take some extra fitting, so it is recommended to be fitted by an accredited Croplands Service Agent.

Note – a fitting charge may apply.

## CROPLANDS VIGNE 3-POINT LINKAGE SPREADER FOR INTENSIVE ORCHARD PLANTINGS AND BERRY GARDENS

- » Width – ONLY 116cm – ideal for any narrow plantings
- » Fully stainless steel fertiliser conveyors for band spreading from 1.5 to 5 metres
- » Double hydraulic double acting control for flow shutters – adjust each shutter individually
- » Stainless steel discs and internal grids
- » LONG-LIFE vanes
- » Manual flow regulation – easy settings system
- » PTO shaft supplied to drive the discs
- » Fast and easy access lubrication system for the transmission
- » Capacity – 500 litres, expandable to 750 litres (with added spacer)
- » Rated to 1500kg payload
