

Stumps Taking Too Long To Grind?

Save time & money and disintegrate tree stumps into wood chips quickly with Digga's Terminator. With its own motor and Carbide tipped teeth, ensure you get the job done effortlessly. Our stump grinder is powered by a 28hp class direct drive engine eliminating the need to rely on the machine's hydraulics.

The Terminator has proven to be very popular for tree care professionals and land care maintenance. Fingertip controls fit to the loader for safe and easy operation offering easy-to-use hydraulic slew.

Features:

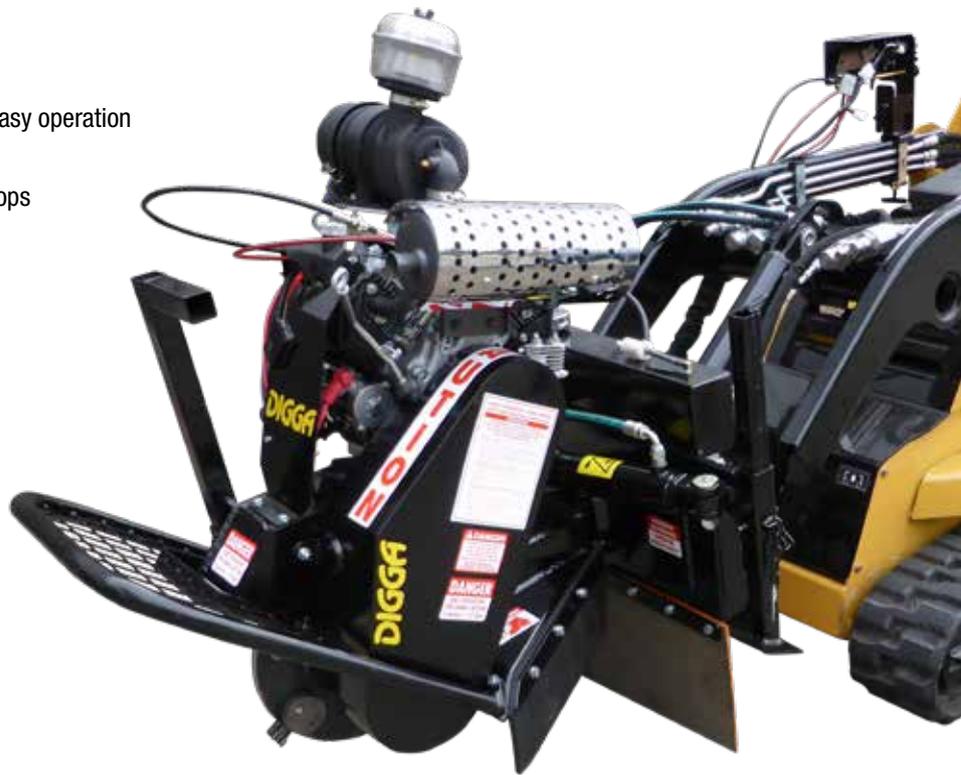

- Fingertip controls fit to the loader arm for safe & easy operation
- Triple belt drive system handles horse power load
- Centrifugal clutch system ensures cutting wheel stops turning when motor is idling
- Hydraulic powered 45° slew either side
- Powered by its own 28HP class Honda engine
- 3 different teeth options
- Quality Australian made

Ideal Use:

Removal of tree stumps

Machine Suitability:

Mini Loaders with more than 270Kg lifting capacity
